SCIENCE.
STRATEGY.
SUCCESS.

MISSION

Abba Makolin Waldron & Associates, LLC (AMW) delivers technical excellence in process improvement to fiber-and web-based business. We create long-term, trust-based partnerships with our clients. These partnerships are designed to help businesses reduce waste and rejuvenate process efficiency by utilizing enhanced structures, optimal raw materials and rigorous quality-control systems. AMW provides services to US and global companies of all sizes.

Our goal is simple... we help businesses refine their processes to maximize productivity and profitability.

AMW uses a 3-step approach to help you reach your maximum potential and we do it with absolutely no risk to you.*

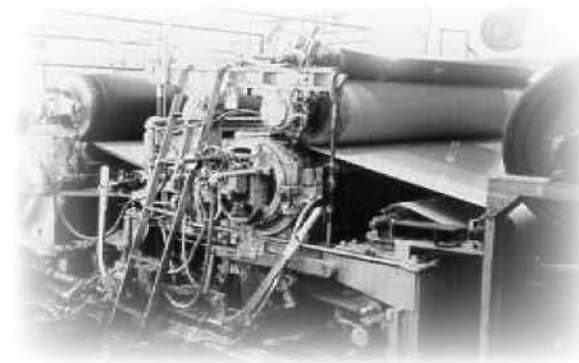

- 1. Introductory meeting to discuss your operations and quality challenges.**
- 2. Perform a process assessment and develop a cost/benefit analysis.**
- 3. Use our assessment to develop an action plan complete with measurable results.**

* If the agreed upon results are not achieved after project completion, our time is free!

AMW BENEFITS

AMW helps you improve your profitability by:

- Increasing process efficiency
- Reducing manufacturing waste
- Increasing manufacturing up-time
- Increasing mill throughput
- Improving product quality
- Selecting appropriate raw materials
- Developing product structures with improved function

SERVICE FEATURES

- Great Value: pay-back well in excess of money and resources spent
- Technical excellence
- Fact-based decision making
- Friendly, personal service, promoting an atmosphere of partnership
- Dependable performance
- Strong vendor relationship experience

WHO WE ARE

We are a manufacturing process consulting company that uses insightful experimental design, technical excellence, and effective teamwork to develop innovative solutions to process-related challenges in mill operations. AMW excels in the design and optimization of processes and the development of materials for specialized products.

The partners are experienced in all facets of fiber and web production, including pulp, tissue, fluff, airlaid, spunbond, meltblown, and other continuous processes, including FDA-compliant industries.

AMW was formed in June of 2004 to provide process consulting services to companies interested in increasing their profits by improving their processes and materials.

AMW was formed by Rod Abba, Bob Makolin and Bob Waldron...

...who worked together for several years on a process team at the Kimberly-Clark Corporation.

Their process team successfully led and completed projects ranging from small one-day trials identifying quick process improvements to large multi-million dollar projects that lasted several months. Between the three of them, they have...

...over 75 years of experience...

...Starting up and fine-tuning processes in the pulp & paper, non-wovens, and consumer products industries at Kimberly-Clark and at other large global companies.
