Clark Miller, PMP, PE

“Companies that operate as an integrated system are the most customer-centric, agile, quality focused, efficient and profitable.”

Clark has over 25 years of project management experience working a range of companies from small, 20 employee, companies to Fortune 500 companies in the areas of product development, operations and process improvement. He is a LEAN visionary who understands that process continuity and improvement has to extend beyond the factory floor in order for companies to realize their full operational and profit potential!

Clark has been working with companies for the past 6 years from the executive level to the ground level as a tactical leader and trainer.

Services provided:

- LEAN operations and process improvement.
- Kaizen events.
- Operations FLOW development, planning and implementation.
- Facility operation assessment, layout and best fit utilization.
- Supply Chain Management.
- Capital equipment installation, facility and operation startups.
- Start-up Organizations; operations development and implementation.
- Operation Business analysis and Business plan development.
- Project management, PMO development, Hoshin development and implementation.

Clark has extended the application of LEAN manufacturing and LEAN support operations into all sectors of manufacturing. Consulting services in implementing LEAN, quality standards, and SCM have been provided to various manufacturing, software development and data processing business sectors.
