What is INTERACT?

- INTERACT** is a behavior assessment profile that quickly identifies an individual's personal style, preferred communication methods, strengths and stretches.
- INTERACT** is one of the easiest, most powerful developmental tools to interpret and apply.
- INTERACT** empowers individuals to enhance their relationships by better understanding their personal styles and the styles of others.
- INTERACT** identifies four personal style blends of the individual and specific communication and rapport building strategies to use for collaboration with others.
- INTERACT** measures how personal styles function under favorable and stress conditions—reflecting the way business and life really work.

To accelerate your personal growth and development the **INTERACT PROFILE** will assist to:

- Identify your personal strengths and behavior patterns that contribute to your effectiveness.
- Explore how you can effectively communicate with people having different personal style preferences.
- Recognize that personal style differences are resources that can be used to help you grow and be of greater service to others.
